Experience

Open Source Contributor — Material UI (MUI)

Jan 2026

PR: github.com/mui/material-ui/pull/47526

- Fixed a long-standing bug where the `Select` dropdown width failed to update on window resize in a 90k+ GitHub star repository.
- Implemented a `ResizeObserver`-based solution and resolved CI/browser test failures through multiple maintainer review iterations.

Open Source Contributor — react-admin (Marmelab)

Jan 2026

PR: github.com/marmelab/react-admin/pull/11101

- Introduced the opt-in `disableAutoFocus` prop for `SimpleFormIterator`, giving developers control over focus behavior in dynamic forms.
- Maintained backward compatibility while adding Storybook examples, tests, and documentation for the new API.

Open Source Contributor — Hyperledger Iden3 SDK

Dec 2025

PR: github.com/hyperledger-iden3/sdk-ts/pull/582

- Fixed a security bug in the DID resolver where the integrity check became ineffective, allowing tampered long-form DIDs to resolve without validation.
- Implemented the correct SHA-256 verification logic and added regression tests to ensure modified DID states throw the appropriate validation error.

Projects

Mistake Count | *Next.js, Express, PostgreSQL, Prisma, TailwindCSS*

Live 

- Mistake Count is a personal mistake tracking platform that helps users log mistakes, identify recurring patterns, and improve over time.
- Provides structured analytics and history to encourage continuous learning through reflection and data-driven insights.

Feed Me Daddy | *Next.js, Express, PostgreSQL, Prisma, TailwindCSS*

Live 

- Feed My Daddy is a YouTube discovery platform that analyzes user preferences to recommend fresh, diverse content beyond algorithmic recommendations.
- Built with Google OAuth, YouTube Data API, Prisma, and PostgreSQL to securely fetch user data and generate personalized recommendations.

Drew | *React, TypeScript, Redux Toolkit, TailwindCSS, React Konva, Supabase*

Live 

- Drew is a visual architecture builder, a lightweight Excalidraw style diagramming tool for creating clean architecture diagrams.
- Supports drawing, moving, resizing, and editing elements through an intuitive infinite canvas interface.

Technical Skills

Languages: JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Redux Toolkit, Prisma, Tailwind CSS, shadcn/ui

Databases: PostgreSQL, Supabase

Developer Tools: Git, GitHub, Postman, Prisma Studio

Core Concepts: REST APIs, Authentication (OAuth), State Management, Responsive Design, Database ORM, Error Handling

Education

Modi institute of Technology

Bachelor of Technology in Artificial Intelligence and Data science (GPA: 8.6 / 10.0)

Expected September 2028

Kota, Rajasthan
